

Release notes - Presenter 10.0.9

1.1 Release date and general information

The next version of Presenter (10.0.9) will be released on Monday 26 October.

The focus of this release is to improve the user experience of Presenter 10. Based on the feedback we have received and personal experiences, several items have been rearranged to make the package feel more user-friendly and intuitive. Furthermore, various functionalities have been added and the performance and stability of Presenter have been optimised.

1.2 New functionalities and improvements

Feature	Affected Presenter platform	Description
3D models	All platforms	The loading speed and the actual look of all the 3D models is improved.
Tool Classroom Planner	All platforms	This tool allows teachers to create a classroom plan of their own classroom, so students know at which workspace they are positioned.
Text editor 2.0	All platforms	Possible to style selections of the text that is inserted in the text box. The latest settings in the text editor bar are remembered when a new text box is created.
Fly-out improvements	All platforms	The fly-out system has been rewritten to ensure that a fly-out will automatically adjust itself to stay inside of the boundaries of the Presenter screen. All fly-outs close when you click next to them.
Renewed & improved interface	All platforms	<p>The design and structure of the user interface has been updated to improve the overall workflow within the Presenter.</p> <p>The following changes are implemented:</p> <ul style="list-style-type: none"> • The menu is splitted in a settings button and help-button. They are both positioned in the bottom right corner, for more convenient access. • An improved, easy to use, toolbar.

		<ul style="list-style-type: none"> • The full screen button is positioned in the canvas navigator. • The pan mode functionality is directly accessible. • The Presenter and Pronote design are matched.
Insert screenshots	Web version	Easily add screenshots of other apps or browser tabs to your Presenter file using the photo camera button.
Backgrounds	All platforms	The chosen background is automatically applied to the new page you add after the active one.
Backgrounds	All platforms	It is possible to zoom in or out on the selected background to enlarge or reduce the selected pattern.
Easy import of images and sounds	All platforms	The import button is added to the media library in the web version of Presenter 10. Also in the iOS and android app we offer access to the finder.
Visibility of the categories 'My images' and 'My sounds'	All platforms	The categories 'My images' and 'My sounds' are visible in the medialibrary. This makes it possible to fill open tools with personal content.
Export	All platforms	Presenter files can be exported to the file formats PDF, BMP, PNG and JPG.
Center of circle	All platforms	The center of the circle you create with the pair of compasses tool is made visible.
Faster loading speeds	All platforms	The ordering system has been improved to increase the order speed of objects. This increases the loading speed of Presenter files.
Copy and paste cross tabs	Web version	It's possible to copy and paste content and complete pages between separate Chrome browser tabs.
Sneak peek mode	All platforms	<p>Functionalities that are currently under construction will be accommodated in the Sneak Peek mode. This mode can be activated in the settings menu.</p> <p>The collaboration function will now be part of this.</p>
Visible release information	All platforms	After a Presenter update, an overview appears on which the release notes and clarifying visuals are shared about the latest software version.

1.3 Fixed bugs
